

DUBAI COLLEGE

A tradition of quality in education

3 October 2011

Dear Parent/Guardian,

Several Biology students in Year 12 and 13 have asked if they may purchase a year's subscription to the magazine 'Biological Sciences Review' published by Philip Allan. This is a magazine that provides a wide range of excellent articles specifically for students studying A level Biology. There are four magazines released each year and each contain articles written by leading Biology examiners and subject specialists providing valuable additional material on many of the key topics to help students achieve their full potential at AS and A2 Biology. The subscription also enables the students to access free online resources to support and develop understanding.

Further details regarding the magazine can be obtained on the Philip Allan Website www.philipallan.co.uk

The college is an institutional subscriber to the magazine and as such we are able to purchase additional student copies at a reduced overseas rate of 110 dirhams a year.

If your son or daughter wishes to subscribe to the magazine (and we would obviously encourage them to do so), can they complete the slip below and return it together with AED 110 in cash or as a cheque (made payable to Dubai College) to their Biology teacher as soon as possible.

Yours sincerely,

Mr. P Rivers
Subject Leader: Biology

Dear Mr Rivers,

I wish to subscribe to the Biological Sciences Review magazine and enclose AED 110 cash or cheque (made payable to Dubai College).

Student's Name: _____ Form: _____

Name of Student's Biology Teacher: _____
